SUMMARY

I'm a Frontend developer based in Vancouver. I specialize in building accessible and user-friendly products. My expertise includes technologies like TypeScript and React, allowing me to create interactive and responsive experiences for the web.

EMPLOYMENT

Neon, Frontend Developer, Vancouver, BC Sept. 2019 - Current

I am a skilled developer who uses React, TypeScript, and other cutting-edge technologies to create powerful products. I work closely with other professionals to develop reusable components and dependable design systems, using Scrum practices to ensure efficient collaboration. My goal is to provide top-quality products that meet users's needs while staying up-to-date with the latest technologies and industry best practices. Additionally, I help onboard new developers and mentor junior team members.

Starling Minds Inc, Frontend Developer, Vancouver, BC Sept. 2018 - July 2019

I used Cordova and Vue.js to build the front end of the Mental Health Platform and collaborated with the back-end team to maintain high coding standards.

Self Employed, UI Designer, Belo Horizonte, Brazil Jan. 2014 - July 2017

I created design proposals, explored and crafted solution concepts, and ensured that deadlines and clients' requirements were met. My focus was on producing mobile-first interfaces and graphics that were of high quality and scalable. I implemented colour principles, typography, and user experience best practices in all steps. By developing interfaces from concept to final product, I successfully resolved clients' communication issues, which resulted in a boost in their overall profit.
