SUMMARY

I'm a frontend developer based in Vancouver. With years of UI design experience, I am attentive to detail and focused on creating user-friendly products. My expertise includes technologies like TypeScript and React, allowing me to create interactive and responsive experiences for the web. I am passionate about the possibility of building products that will make people's lives easier and more enjoyable.

EMPLOYMENT

Neon, Frontend Developer, Vancouver, BC

Sept. 2019 - Current

As a frontend Developer at Neon, I use React, TypeScript, Storybook, GraphQL, Styles Systems, Styled Components, and Emotion to build products that matter. Collaborating daily with other developers, designers, and PMs, I build reusable components and write end-to-end test cases to ensure robust and reliable products. I also write Storybook stories to keep the Design team and other developers in sync with the User Interface. Additionally, I participate in all Scrum practices, and present demos on work accomplished. I am committed to delivering high-quality products that meet users' needs while continuously improving my skills and knowledge of the latest technologies and best practices.

Starling Minds Inc, Frontend Developer, Vancouver, BC

Sept. 2018 - July 2019

I worked on building the front end of their new Mental Health Platform using Cordova and Vue.js. I built reusable components for internal features like date and time pickers and wrote clean, scalable code to fix bugs. I collaborated with the back-end team to ensure seamless API integrations and participated in Scrum practices like sprint planning, daily stand-ups, and backlog grooming. Additionally, I contributed to documentation regarding best practices and coding style standards to maintain high quality in the codebase.

Self Employed, UI Designer, Belo Horizonte, Brazil

Jan. 2014 - July 2017

presented design proposals, researched and developed solution concepts, and met deadlines and clients' requirements. I developed high-quality and scalable interfaces and graphics focused on mobile-first, using color principles, typography, and user experience best practices. I successfully solved clients' communication problems by designing and developing interfaces from concept to final product, increasing overall profit.

STACK

TECH STACK: TypeScript, Javascript, React, Vue, GraphQL

DESIGN: Sketch, Illustrator, Photoshop, inVision

SPOKEN LANGUAGES: Portuguese, English, Spanish, French, Danish

EDUCATION

Lighthouse Labs

Web Development Bootcamp 2018
